

Task Assignment: Customer Satisfaction Survey Analysis

Objective:

Analyze customer satisfaction survey results to identify key areas of customer dissatisfaction, measure satisfaction trends, and recommend strategies to improve customer experience.

Team Members and Roles

1. Data Analyst 1: Data Preparation and Cleaning Specialist-Aditya Zanjurde (9767136651)

Responsibilities:

- **Survey Data Collection:** Collect survey results from all available sources (e.g., online survey platforms, email responses).
- **Data Cleaning:** Remove incomplete responses, duplicate entries, and handle missing data by either filling in or excluding irrelevant data points.
- **Data Transformation:** Standardize the data, ensuring that all customer satisfaction ratings and feedback are formatted consistently for easy analysis.
- **Basic Exploration:** Perform a basic review of the data to check for any inconsistencies or outliers that might skew the analysis.

2. Data Analyst 2: Analysis and Reporting Specialist- Pawan Rao (7517916375)

Responsibilities:

- **Sentiment Analysis:** Analyze open-ended survey responses (e.g., customer feedback) to assess overall sentiment. Categorize feedback into positive, neutral, and negative sentiments.
 - **Trend Analysis:** Examine satisfaction scores (e.g., from 1-10 scale) over time to detect any trends or shifts in customer satisfaction.
 - **Key Issue Identification:** Identify the most common complaints or suggestions provided by customers and categorize them (e.g., product quality, customer service, delivery issues).
 - **Survey Segmentation:** Segment the survey results based on customer demographics (if available) to see if specific groups are more or less satisfied.
 - **Visualization and Dashboard Creation:** Create graphs, charts, and dashboards to effectively communicate the findings from the survey analysis. Highlight trends and key areas of concern.
 - **Actionable Insights and Reporting:** Summarize findings into a report with actionable recommendations aimed at improving customer satisfaction and addressing major issues identified.
-

Deliverables:

1. **Cleaned Survey Data:** A refined dataset ready for analysis, with missing or incomplete data handled and formatted for easy use.
 2. **Visualizations:** Graphs and charts showing trends in customer satisfaction, sentiment distribution, and key issues.
 3. **Analysis Report:** A detailed report with insights from the survey data, including recommendations for improving customer experience based on the feedback provided.
 4. **Presentation:** A summary of key findings and actionable recommendations to present to stakeholders (marketing, customer service, or management teams).
-

Final Deadline: January 8, 2025 (by end of day).

Expected Outcome:

By the end of the task, the team will have a comprehensive understanding of customer satisfaction levels, the main pain points affecting the customer experience, and clear recommendations to improve service or products based on the survey findings.
